

Description:

- **100% brand new and high quality**
- Material: Electronic Component
- **Color: See pictures**
- Input voltage range : 2-24V DC
- Output voltage range : Max 28V DC
- Efficiency : 93%
- Output current : 2A
- The input voltage should not exceed the maximum input voltage.
- The peak current output current is no more than TV university.
- When adjust the blue potentiometer ,please use a multimeter to monitor the voltage
- Rotating Clockwise can rise the voltage while rotating counterclockwise could lower the voltage
- When the module output voltage can not be adjusted (the output voltage is always equal to the input voltage) Please adjust the potentiometer counterclockwise 20 laps (20 turns) or more till it works.
- The image is for illustration
- Size: 3.7 * 1.7 * 1.4cm/1.46"*0.67"*0.55" (L*W*H)
